

# LEGACY

## A modern take on an eighteenth century standing seam roofing style

LEGACY has been specifically introduced to complement our EuroLine range of roofing products, with their unmistakable eighteenth century standing seam roofing style. It incorporates modern high strength roll forming technology to eliminate the need for supporting plywood substrate and is available in continuous lengths.

An architectural feature of this profile are the undulations in the wide flat pan, which can be expected in this type of roof profile.

LEGACY is a concealed clip fixed trough section roof and wall cladding suitable for:

- Roof cladding down to a minimum pitch of 3°
- Vertical wall cladding installed over a drained cavity. Installation to supports at 600mm spans on buildings within the scope of NZS 3604
- Available in 0.55 BMT COLORSTEEL®

The LEGACY profile
