SERVICES

WORKPLACE SAFETY IS CRITICAL

Managing, maintaining and monitoring the safe condition of your lifting and height safety equipment is required under the Health & Safety at Work Act 2015 and the Worksafe Approved Code of Practice for Load-Lifting Rigging. This includes traceability and certification of these items along with maintaining records of regular testing and inspections, including proof loading where applicable.

With critical requirements such as these, working with the right service partner is vital.

Backed by one of New Zealand's most trusted brands and a nationwide network, when dealing with our Chain & Rigging team you can be assured of reliable and professional service giving you peace of mind that your people are kept safe when using lifting equipment and working at heights.

- > Onsite Compliance Testing, Certification and Tagging
- > Clear and Transparent Pricing Model
- > Tailored Technical Advice and Specification to Suit Your Business Needs
- > Managed Online Compliance Register and Renewal Reminders
- > Manufacturing, Repair and Supply

Steel & Tube supply a comprehensive range of high-quality Chain & Rigging products by well-known brands and hold the exclusive New Zealand agency for the European Pewag lifting range. The scale of S&T's logistics and supply chain networks means we can offer quick access to products globally including indent and air freight options.

Enquiries are welcome, please contact your local Steel & Tube branch or:

Delivering the right solutions for you and your business

Nationwide Mobile

Service From an Expert Team

Steel & Tube's team of 20 specialist mobile technicians are available to you onsite, anywhere in the country, no matter how remote. They love working with our customers offering great service, expert advice and tailored solutions. Our service vans are well equipped and fitted with a test bed suitable for proof loading items such as chain slings, chain blocks and other items.

Maintaining Your Equipment in Safe Working Order

Our technicians maintain and repair lifting, rigging and lashing components, including disassembly and service of manual lifting hoists to ensure safe operation and maximum longevity. Height Safety items can be replaced, repaired or refurbished.

Manufacturing Services

Our team offer a bespoke manufacturing service with chain slings made to your exact specifications using G80, G100, G120 alloy, or INOX G6 Stainless and our wide range of componentry. Wire ropes can be supplied with hard or soft eyes, and with terminations and fittings to suit your requirements. All manufactured items, where appropriate, are supplied with a new compliance tag and entered into your client register.

Test, Tag and Register.

Entirely Traceable

Great asset management means providing traceability for your Lifting, Rigging and Height Safety equipment. For each item tested we update our cloud-based client register with a unique ID, Item details, Load Rating and next Test Date, providing everyone with up-to-date records of compliance and due date reminders. We offer each client a login and 24/7 access to their own register, and the ability to download.

Service and Pricing Model

We pride ourselves on offering an efficient and market leading service which delivers real value to you, the customer. With a transparent pricing model and no extra hidden charges, we strive to provide you with certainty and confidence that your compliance needs are in good hands.
