

Environmental Policy

At Steel & Tube we aim to make a tangible difference to the environment with a range of management systems and industry-best practice initiatives designed to minimise the impact of our activities.

- We are committed to protecting and enhancing our environment while carrying out our functions and duties
- We comply with all relevant environmental legislation
- We continually seek to minimise the environmental effects of our activities
- We are committed to reusing and recycling and ensuring we dispose of residue in an environmentally safe way
- We are committed to continually improving our environmental performance by implementing, monitoring and reviewing our policies, programmes and services

To achieve these objectives, we will:

- Meet all legislative requirements relating to the environment and seek to exceed the legal minimum
- Provide training, as appropriate, to provide the skills and knowledge necessary to manage environmental risk and conform to the relevant legislation
- Use, store and dispose of chemicals in a way that avoids or minimises any adverse environmental effects
- Minimise energy consumption, select sustainable energy suppliers, and reduce hazardous and consumer waste
- Put in place programmes to minimise environmental harm that take into account regulatory, technical and scientific developments as well as customer needs and community aspirations
