

# RAPID POST

**The Rapid Post is designed to speed up fencing and make installation easier. The revolutionary self-sprung stainless steel clip firmly holds the fencing wire in the slot doing away with the need to cut tie wire saving both time, money and frustration!**

The Rapid Posts are manufactured from steel billet which is rolled to form the Y shape. They are heavy weight compared to many other posts at 2.04kg per metre with precision cut ends to prevent the post from twisting as they are driven into the ground. The posts are hot dip galvanised after processing.

The Rapid Posts are available in both 9 clip and 14 clip versions and in lengths of 165cm and 180cm. See over the page for the different fence designs that can be achieved using the Rapid Posts.

# BOUNDARY FENCE

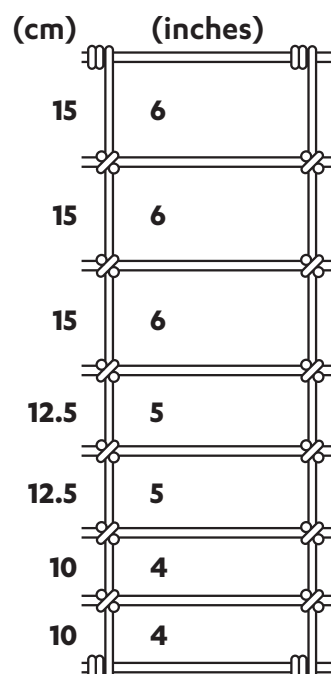

8 / 90 / 30

**NEW  
PRODUCT!**

Along with our tried and true Staytight fence the square knot Boundary Fence brings a new dimension to our range.

Boundary fence is designed to handle pressure from stock with performance and exceptional value in mind.

Designed for NZ conditions with longevity and durability, 2.8mm HT top and bottom wires and a knot that locks the vertical and horizontal wires to minimize wires sliding.
