HI-PERFORMANCE

What is Hi-Performance Wire?
A durable wire with active anti-corrosion protection that is far superior to the protection offered by galvanised coatings.

Benefits
- The formation of a thick, hard layer of aluminium oxide on the wire that stops or considerably slows down the corrosion process in a way that is far superior to that of pure zinc
- Coating has significantly improved ductility
- A long-lasting smooth surface
- Its surface maintains its original smoothness even when subjected to corrosion
- Better self healing when integrity of coating is damaged
