RURAL & FENCING

Hurricane panels are an attractive slimline profile offering a safe and secure fencing system.

Fold top panels are the accepted profile recognised as a superior fence solution.

Hurricane gates are free swinging, have simple latches and optional self closing hinges.

SAFE AND SECURE

For over 80 years Hurricane has provided a range of high quality, hard wearing products made to last in New Zealand's harsh environment.

Keep young children and property safe and secure with the Hurricane School Fence System. Long, strong, vertical uprights do not provide a foothold.

The open styling of the Hurricane school fence allows the children to be seen at all times and gives endless scope for landscaping and views. Ideally suited for those locations where visual appeal and integrity of the access share equal importance.

Hurricane school fence is compatible with most post materials, however an attractive result is achieved with Hurricane square tube posts.

The option to flange posts enables the posts to be bolted onto existing deck or paving. The school fence gate can be attached to the Hurricane square tube posts with the option of the lockable, childproof Magna gate latch and self closing hinges. Hurricane School Fence and Gates are manufactured to the highest standards and like all Hurricane products are 'Built to Last'.
