Hi Rib is a high tensile wide cover clip fastened trough section or decking profile.

APPLICATIONS
- Residential Roofing and Cladding
- Industrial/Commercial Roofing and Cladding
- Canopies

FEATURES
Hi Rib is manufactured from high tensile material, enhancing its performance under both point load and distributed load. The slightly trapezoidal rib profile enhances resistance to foot traffic damage, and allows for end-lapping where required, while the greater cover gives material and installation labour advantages.

OPTIONS
Clear sheeting is available in profiled G.R.P. (fibreglass) to match.

MATERIALS
Available in metallic coated and pre-painted steel in .48mm and .55mm B.M.T. (base metal thickness), aluminium plain and pre-painted in .70mm and .90mm, and other non-ferrous metals.

FASTENERS
Typically: Fastened with a Zincalume steel bracket, attached to each support member with two 10g x 45mm wafer head Timberfix screws, or two 10g x 16mm wafer head Steelfix screws to steel.

DURABILITY
All material selections must be compatible with prevailing environmental conditions and adjacent materials, see Roofing Solutions Product Guide or Specifiers Guide for details. Areas not exposed to rain washing will require programmed maintenance.

WARRANTY PLUS
Steel & Tube WarrantyPlus is the most comprehensive warranty available in the industry. WarrantyPlus covers an extended range of performance criteria, is supported back-to-back by our suppliers, includes site-specific maintenance requirements and is transferable to subsequent owners.

 Loads are Ultimate Limit State loads in Kilopascals.

**MINIMUM PITCH**

In accordance with Acceptable Solution E2, the minimum pitch for Hi Rib for roofing dwellings is 3°. Roof runs in excess of 75 metres should be checked for water runoff capacity.

**FOOT TRAFFIC**

Foot traffic up the roof must take place in the pan of the profile, or over purlin lines. Traffic across the roof must take place along purlin lines.

**SPECIFICATIONS**

Recommended specifications are available in the branded sections of Masterspec BASIC or Masterspec STANDARD, or from your local Steel & Tube branch or visit our website.

**DESIGN DETAILS**

Design details covering many applications are available on our website in CAD and PDF under each product section. Visit www.steelandtube.co.nz.

**IMPORTANT PUBLICATIONS**

For your installation to perform to its potential, it is essential that it is designed, installed and maintained in accordance with good trade practice. Please refer to:

- Steel & Tube: Roofing Solutions Product Guide
- New Zealand Steel: Installation Guide
