**PRODUCT TECHNICAL STATEMENT**

**STC900**

**Profiled Metal Cladding**

**DESCRIPTION**

**STC900** is specialist medium rib cladding profile.

**APPLICATIONS**

- Specialty Cladding
- Ceilings and Linings
- Curving
- Canopies

**FEATURES**

**STC900** is specially designed for pan-out wall cladding, or canopies, where the normal underside of the profile is exposed to view. Fine flutes in the face highlight the surface and accentuate the negative detail, while special modifications to the side lap detail means that weatherproofness and good looks are maintained from both sides of the profile.

**OPTIONS**

Clear sheeting is available in profiled G.R.P. (fibreglass) to match. **STC900** in .55mm steel can be crimp curved concave or convex.

**MATERIALS**

Available in metallic coated and pre-painted steel in .40mm and .55mm B.M.T. (base metal thickness), aluminium plain and prepainted in .70mm and .90mm, and other non-ferrous metals.

**FASTENERS**

Typically: Pan fastened with Timberfix 12g x 30mm screws, or Steelfix 12g x 20mm, Class 4 minimum, of material compatible with that being fastened and durability no less than the sheet material. Category 5 or non-ferrous fasteners are recommended for severe or very severe marine environments. For under-slung canopies the fastener should be mated to a 16mm diameter embossed washer.

**DURABILITY**

All material selections must be compatible with prevailing environmental conditions and adjacent materials, see Roofing Solutions Product Guide or Specifiers Guide for details. Areas not exposed to rain washing will require programmed maintenance.

**WARRANTY PLUS**

Steel & Tube **Warranty Plus** is the most comprehensive warranty available in the industry. **Warranty Plus** covers an extended range of performance criteria, is supported back-to-back by our suppliers, includes site-specific maintenance requirements and is transferable to subsequent owners.

Limit state loads in kPa at stated spans using 6 fasteners per sheet per support. Loads for alternative fastener frequencies available on request.

SPECIFICATIONS

Recommended specifications are available in the branded sections of MasterSpec BASIC or MasterSpec STANDARD, or from your local Steel & Tube branch or visit our website.

DESIGN DETAILS

Design details covering many applications are available on our website in CAD and PDF under each product section. Visit www.steelandtube.co.nz.

IMPORTANT PUBLICATIONS

For your installation to perform to its potential, it is essential that it is designed, installed and maintained in accordance with good trade practice. Please refer to:
